DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claim 1 recites a connector unit for a HF radio apparatus comprising a housing, an internal antenna located inside the housing, a radio circuit provided inside the housing, and an external capable inserted or drawn from the housing, wherein the connector unit comprises a printed board having a first microstrip line connected to the radio circuit, and a second microstrip line connected to the internal antenna, a fixed contact provided on the printed circuit and connected to the second microstrip line, a movable contact provided on the printed circuit and connected to the first microstrip line and urged toward the fixed contact, and a socket for covering the movable contact and the fixed contact. When a distal end of the external antenna inserts in the socket between the movable contact and fixed contact, the distal end abuts on the movable contact and presses the movable contact to separate the movable contact from the fixed contact, and the external antenna is matched in impedance and connected to the radio circuit. When the external antenna draws from the socket, the movable contact abuts on the fixed contact and the internal antenna is matches in impedance and connected to the radio circuit.

None of the prior arts shows or suggests this connector unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
